## DETAILED ACTION

### *Response to Arguments*

1. In response to applicant's response filed 25 February 2005, the status of the application is as follows:

#### Drawings Objection

The objection of the drawings is maintained. The newly proposed drawings contain new matter and therefore fail to rectify the original drawing objection.

#### Rejection under 35 U.S.C. §112, first paragraph

The rejection of claims 1-11 under 35 U.S.C. §112, first paragraph is withdrawn in view of applicant's amendment canceling the claims.

#### Rejection under 35 U.S.C. §112, second paragraph

The rejection of claims 1-11 under 35 U.S.C. §112, second paragraph is withdrawn in view of applicant's amendment canceling the claims.

#### Rejection under 35 U.S.C. §102

In view of applicant's amendment canceling claims 1-11, the rejections under 35 U.S.C. §102 have been withdrawn.

#### Rejection under 35 U.S.C. §103

In view of applicant's amendment canceling claims 1-11, the rejections under 35 U.S.C. §103 have been withdrawn.

***Information Disclosure Statement***

2. The Information Disclosure Statement filed 15 January 2004, previously indicated as being an improper submission, has been fully considered and the initialed and signed copy is included in this response. In the first Office Action, copies of the foreign documents appeared to be missing from the file. However, the references have since appeared in the file with the above date of filing and are considered timely filed. The Examiner regrets any inconvenience.

***Drawings***

3. The proposed drawings are objected to because the new drawings of Figures 3 & 4 contain new matter. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the

examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

4. The amendment filed 04 March 2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: proposed drawings for Figures 3-4 and the reference numerals contained therein, and newly added Specification paragraphs [00030] & [00031] containing said reference numerals.

Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 12-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 12 contains new matter. Namely, the "mistake-proof flange-mounting" includes structure which was not part of the original

disclosure as filed, for instance, the flange ports. Moreover, the "common holding and dispensing container having a plurality of receiving ports" is new matter.

### ***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

8. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
